How Pypestream Powers Enterprise Transformation

AI MICROAGENTS

Solving Any Problem, Anywhere

Task-Specific Intelligence: Over 3,000 prebuilt microagents handle everything from vendor communications to customer interactions.

Customizable and Scalable: Microagents adapt to your enterprise's needs, combining into large systems to deliver end-to-end automation.

Real-Time Automation: Operate 24/7 to deliver immediate results for customers, employees, and vendors.

AUTOMATION

The Power of the Autonomous Intelligence Platform

Speed and Agility: Deploy solutions in days, not months, with rapid customization and deployment.

Universal Connectivity: Integrates with any system—ERP, CRM, ITSM, or procurement tools —to unify workflows across the organization.
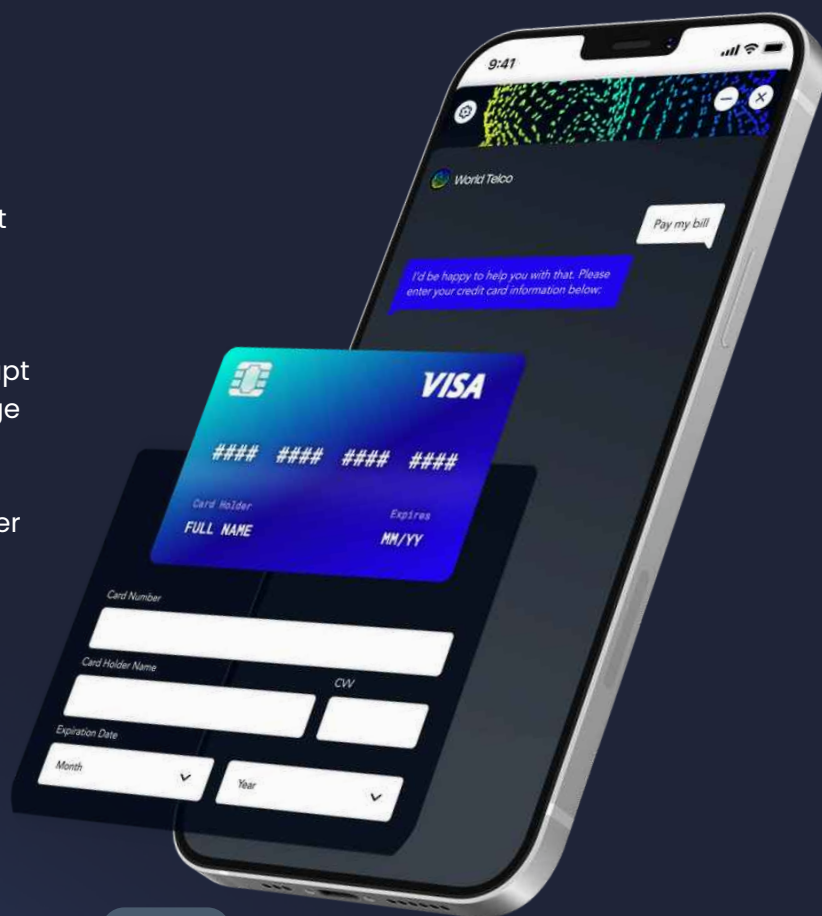

Omnichannel Interface: Engage customers, employees, and vendors via chat, voice, mobile, or web.

SCALE

Usage-Based and Solution-Based Pricing Model

Flexible and Scalable: Pay only for what you use with usage-based pricing, or opt for solution-based pricing for customized packages tailored to your needs.

Proven ROI: Demonstrated cost savings and operational improvements across industries.

Key Use Cases
Tailored for CIOs & CTOs

USE CASE	HOW WE ACHIEVE IT	EXAMPLE	IMPACT
Increased Revenue	Drive sales with AI-powered virtual assistants that support customers, automate upselling, and provide personalized recommendations.	A major consumer goods company boosted upsell rates by 15% using AI-powered virtual advisors.	**20%** **boost in sales conversion rates,** 25% increase in average transaction value.
Enhanced Customer Experience	Provide proactive customer service through personalized, real-time virtual assistants that automate inquiries and updates.	An insurance company reduced call center volume by 30% with automated claims workflows.	**40%** **faster resolution times.** 20% improvement in NPS.
Improved Employee Productivity	Automate repetitive helpdesk tasks such as password resets, IT troubleshooting, and HR queries, enabling employees to focus on strategic work.	A Fortune 500 company reduced IT helpdesk workload by 50%, freeing up staff for high-impact tasks.	**25%** **reduction in employee task burden.** 15% improvement in internal productivity.
Optimized Vendor Management	Automate vendor onboarding, invoice processing, and compliance verification, providing real-time updates on invoice status, purchase orders, and delivery schedules.	A logistics company cut invoice processing times by 50% with vendor-facing microagents.	**40%** **reduction in vendor-related delays.** 15% increased vendor satisfaction scores.
Improved Network & Infrastructure Operations	Proactively monitor and resolve network issues with AI-driven microagents that automate alerts, capacity planning, and escalation workflows.	A telecom company reduced downtime by 20% using AI-enabled monitoring.	**30%** **faster resolutions,** 15% improvement in network uptime.

The Pypestream Advantage

Speed and Agility
Deploy solutions in days, not months, with rapid development and deployment.

Universal System Integration
Seamlessly integrates with platforms like SAP, Salesforce, Oracle, ServiceNow, and others to optimize workflows across departments.

Omnichannel Flexibility
Engage users—whether customers, employees, or vendors—through the interface that best suits their needs (chat, voice, mobile, or web).

Military-Grade Security
Built with compliance and security at its core, ensuring enterprise data protection.

Proven Scalability
Handles millions of interactions monthly while adapting to your enterprise's growth.
